ACQUISITION

Western Land's team has successfully acquired thousands of miles of Right-of-Way for our clients. From survey through construction and reclamation, our experienced team excels in relationships with landowners to ensure your projects are completed on time and in a cost-effective manner.

GIS/MAPPING

Western Land employs a sizeable GIS department possessing the bandwidth to support a project of any size. Our project managers, field agents, and title team work closely with our GIS analysts to prepare and maintain line lists, integrate survey and engineering data, track progress, and prepare landowner exhibits.

TITLE RESEARCH

Having performed title examination on over 1 million acres nationwide, you can expect efficient and accurate title from our team of seasoned examiners. Team members are cross-trained in surface title, mineral title, and due diligence and we always have the ultimate project goals in mind when executing our work.

WLS has completed over **10,000** miles of ROW projects to date.

BPO SERVICES

Successful projects and portfolios require a strong support team. Our BPO professionals combine land, technical, and multi-industry expertise to provide a robust support network for clients, project managers and general stakeholders as it relates to all of their data, document, reporting, and administrative needs. Considered a one stop shop, our BPO team offers consistent, reliable, and scalable administrative support as your needs ebb and flow. Our ultimate goal is to tackle all of those tedious, back of the office processes, freeing you up to focus on growth and strategy!

DUE DILIGENCE

Western Land has a team of due diligence specialists and have conducted examination on thousands of miles of pipeline rights. With a tried and true process and inclusive reporting, let our team take the uncertainty out of your land acquisition and set your team up for a seamless transition of data into your system.

LAND, ENERGY, & PEOPLE

Any Project, Any Stage: Our experienced team is prepared to support projects of all types, be it pipeline, electrical, utility, renewables, or land acquisition in general. As a fully integrated land services company, Western Land is positioned to allocate the right people with the expertise to get the job done.
